

Hello Everyone, I am Audrey Norris, your National College/Postsecondary President. I am honored to be welcoming you to our first State Officer Monthly Event! This is our first attempt at trying to create better, more consistent connections with our state officers throughout the year. As a national officer team we want to get to know you more and be able to share what we are doing during our year of service. With that being said I would like to take some time to quickly go over some of the things we have done since WLTi.

Since WLTi

- The National Officer team has been adjusting and working with our new National Trainer to come up with processes for what we can as a team to work together.
- National Officers have been attending different FLC events throughout the country
- Representatives of the National Officer Team have been attending DEI Committee meetings to help work towards better inclusive processes for all students in SkillsUSA
- The state officer engagement committee has been created to begin creating better connections with state officers throughout the country while not at conferences

Upcoming Events

- National Officers have been planning SkillsUSA week and coming up with more engaging activities for that week.
- We have been working with our National Trainer to come up with more events for the start of the year to create connections besides WLTi
- We will begin planning and practicing for NLSC this coming semester and will begin planning visits to states for their SLSCs

With that it's about time for us to get onto our activity for tonight. We thought it would be fun to get together and play some light hearted party games! In a moment you will all be directed into a breakout room where you will play kahoot and Gartic phone with national officers and other state officers. We will also just be taking time to talk about the year and hear from your experiences.

Please be respectful of everyone in this call while playing games and try to make new connections! With that, let's head into our breakout rooms!
